Paul Bach  
PJB Mechanical Plumbing and Heating  
#108 – 7402 Progress Way  
Delta, BC V4G 0A1

Dear Paul,

I am happy to provide a reference for the work that PJB Mechanical has done at Blenheim Lodge for several years. You and your company have been our first-call for both routine and emergency plumbing issues for 14 years and we have always found you to be responsive and competent.

In a recent major project, PJB re-piped a 45-year-old wing of our building, completely replacing the heating pipes and the domestic water piping in the renovated floor. We are pleased with the results and the tenants have now moved in with no complaints. A few years ago, you will recall that PJB replaced the domestic water supply lines in the attic of that wing, so now the entire piping in that wing is your work. Prior to that, you re-designed and replaced the domestic hot water system in our boiler room and have maintained that for us since then.

Blenheim Lodge is a licensed 98-bed residential complex care facility providing nursing and daily-living care to frail seniors. We are a service provider to the Vancouver Coastal Health Authority.

We have found PJB's work to be very good and have appreciated the expertise of you, Jaz, and others in your company. I am happy to recommend PJB Mechanical to other employers.

Yours truly,

Derek Morton  
Administrator
