To whom it may concern,

PJB Mechanical was contracted to install a brand new high efficiency boiler and heating system as part of a multi-residential building renovation.

I found the staff to be responsive and helpful especially in preparing documents and submitting applications to obtain the \$3,000 rebate from Fortis BC on the Efficient Boiler Program. They also followed up and made ensure that we received the cheque.

I found PJB staff to be very helpful and friendly throughout the process. I would recommend them to anyone.

Regards,

Gordon Hsu
